Infrastructure Virtualisation

Transforming the Way IT is Delivered

September 2007

Infrastructure Virtualisation

Contents – September 2007

Section 1: Management Summary	9
1.1 Management Summary	11
Section 2: Business and IT Issues	17
2.1 Report Introduction	19
2.2 Business Challenges	20
2.3 The Virtualisation Opportunity	27
2.4 The Business Value of Virtualisation	33
2.5 The IT Benefits of Virtualisation	39
Section 3: Understanding Virtualisation Technologies	49
3.1 Server Virtualisation – Introduction	51
3.2 Server Virtualisation – Emulation	52
3.3 Server Virtualisation – Partitioning	60
3.4 Server Virtualisation – Clustering	64
3.5 Storage Virtualisation	69
3.6 Desktop Virtualisation	78
3.7 Application Virtualisation	84
3.8 Network Virtualisation	89
3.9 Data Centre Virtualisation	91
Section 4: Strategies and Implementation	99
4.1 Preparing and Planning for IT Virtualisation	101
4.2 The Challenges of Implementing IT Virtualisation	105
4.3 Managing the Virtualised IT Environment	110
4.4 IT Virtualisation Maturity Models	114

Contents – Continued

Section 5: Case Studies	121
5.1 Case Studies – Server Virtualisation	123
5.2 Case Studies – Storage Virtualisation	127
5.3 Case Studies – Desktop and Application Virtualisation	130
5.4 Case Studies – Data Centre Automation and Virtualisation	133
Section 6: Market Analysis	137
6.1 Market Dynamics	139
6.2 Vendor Strategies	144
6.3 Future Direction	149
Section 7: Vendor Profiles	155
7.1 Server Virtualisation	157
Cassatt Corporation – Cassatt Collage	157
Enigmatec Corporation – Execution Management System	158
Enomaly, Inc. – Enomalism Virtualized Management Dashboard	159
Leostream Corporation – P>V Direct 3.0	160
Marathon Technologies Corporation	161
Opsware, Inc. – Server Automation System	163
PlateSpin Ltd. – PowerConvert	164
Scalent Systems – Virtual Operating Environment (V/OE)	165
Surgient, Inc. – Virtual QA/Test Lab Management System (VQMS)	166
SWsoft – Virtuozzo	167
Virtual Iron Software, Inc. – Virtual Iron	168
Vizioncore – esxRanger	170
VMware – VMware Infrastructure 3 (VI3)	172
XenSource – XenEnterprise	174
7.2 Application Virtualisation	176
AppStream, Inc. – AppStream 5.2	176
DataSynapse – GridServer and FabricServer	177
Microsoft – SoftGrid	179
Symantec – Altiris Software Virtualisation Solution (SVS)	180
Thinstall – Thinstall 3.1 Virtualization Suite	182

Contents – Continued

7.3 Desktop Virtualisation	183
Citrix – Desktop Broker	183
Leostream – Hosted Desktop Connection Broker	185
Provision Networks – Virtual Access Suite	186
Sun Microsystems, Inc. – Sun Ray 2 Virtual Display Client	190
7.4 Management	191
BMC – Business Service Management	191
CA – CA Unicenter® Advanced Systems Management r11.1	193
HP – HP Management Software	195
IBM – Systems Director	197
7.5 Storage Virtualisation	199
Acopia Networks – ARX Solutions	199
DataCore – SANmelody and SANSymphony	201
FalconStor – ARCserve Solution	204
HP – StorageWorks 200 Storage Virtualization System	205
IBM – Virtualisation Engine	205
7.6 Network Virtualisation	207
Cisco Systems Inc. – Cisco VFrame Server Fabric Virtualization Software	207
Section 8: Glossary	211

This Report reveals:

- How organisations should approach the deployment of Infrastructure Virtualisation.
- Why Infrastructure Virtualisation will become the dominant technology in the data centre within three years.
- The differences between the different types of virtualisation technologies, explaining their relative strengths and weaknesses.
- How Infrastructure Virtualisation can help transform the way IT resources are consumed and deployed within organisations.
- The business challenges, opportunities, and benefits that Infrastructure Virtualisation addresses.
- Why Infrastructure Virtualisation is an important technology that all organisations need to understand and embrace.
- Why management of the infrastructure will become a significant influence on the added value that virtualisation technologies can deliver.
